

RITHIK KUMAR MB

Software Engineer

☎ +91-9353543027 ✉ ffrithik@gmail.com 🌐 github.com/Rithik333R 🔗 linkedin.com/in/rithik-kumar-117a571ba

Summary

Software Engineer specializing in Java, Spring Boot, React.js, AI-integrated applications, REST APIs, and cloud deployment.

Skills

Languages: Java, Python, JavaScript, SQL

Backend: Spring Boot, Spring Security, Spring AI, REST APIs, JPA, Hibernate, JWT, Maven

Frontend: React.js, Vite, Tailwind CSS, Axios

Databases: MySQL, MongoDB, TiDB

AI & Tools: Gemini AI, RAG, Vector Embeddings, Cloudinary, Docker, Git, Postman, Swagger

Experience

Data Analyst Intern

Ants Skill Varsity

Feb 2025 – May 2025

SQL, Tableau, Power BI

- Analyzed datasets containing 10,000+ records using SQL to identify business insights and support data-driven decision making.
- Developed interactive dashboards in Tableau and Power BI, reducing manual reporting efforts by 30%.

Software Developer Intern (IoT)

STPI IoT Open Lab

Sept 2024 – Dec 2024

ESP32, Arduino IDE, Java

- Developed IoT-integrated software systems for real-time monitoring and device communication workflows.
- Optimized backend data communication pipelines, significantly improving response latency and system reliability.

Projects

MockIQ – AI Career Platform | *Spring Boot, React.js, MySQL, Gemini AI*

2026

- Built and deployed a full-stack AI SaaS platform for ATS resume analysis, AI mock interviews, skill-gap detection, and personalized learning roadmaps.
- Developed secure Spring Boot REST APIs using JWT authentication, Spring Security, JPA/Hibernate, and MySQL.
- Integrated Gemini AI for ATS scoring, interview evaluation, skill-gap analysis, and roadmap generation workflows.
- Deployed production infrastructure using Vercel, Render, Aiven MySQL, and Cloudinary.

Free Fire Arena – Esports Platform | *React.js, Node.js, MongoDB, JWT*

2026 – Present

- Developed a full-stack esports tournament platform supporting Battle Royale, Clash Squad, and Lone Wolf formats.
- Implemented JWT-based authentication, role-based access control, tournament registration workflows, and admin dashboards.
- Built automated tournament lifecycle management and result processing systems with dynamic leaderboard generation.
- Designed scalable MongoDB schemas and REST APIs for tournaments, participants, player statistics, and rankings.

NexusHR – AI Resume Assistant | *Spring AI, Gemini AI, React.js, TiDB*

2026

- Built an AI-powered recruiter assistant using Spring AI, Gemini AI, and Retrieval-Augmented Generation (RAG).
- Implemented resume ingestion, vector embeddings, semantic search, and context-aware resume querying.
- Developed secure JWT-authenticated APIs and responsive React-based recruiter interfaces.

Education

B.E. Computer Science and Engineering

T John Institute of Technology, Bengaluru

2021 – 2025

CGPA: 8.36 / 10

Certifications

- IBM: Cloud Application Developer, Predictive Analytics Modeler, RDBMS & Python
- NASSCOM Foundation: Data Analytics Internship Certification
